

Nature's Care®

OPEN-CLOSE

Concentrated enzyme formulation to be used during pool openings and pool closings.

Contains all natural first generation ingredients for the best quality and performance.

APPLICATIONS

POOL OPENING

Circulate any new water with existing water in the pool.
Balance the pH, total alkalinity, and calcium hardness levels.
Apply initial dose of chlorine, preferably dichlor based.
One week later, add one quart of Open-Close directly to pool, which treats up to 20,000 gallons of pool water.

POOL CLOSING WITH COVER

Treat the pool as normal for the off-season and circulate.
Drain water level to winterizing levels.
Add one quart of Open-Close directly to pool which treats up to 20,000 gallons of pool water.
Brush pool walls then cover.

POOL CLOSING WITHOUT COVER

Treat the pool as normal for the off-season and circulate.
Add one quart of Open-Close directly to pool which treats up to 20,000 gallons of pool water.
During extended period of excessive heat and/or precipitation, add another quart of Open-Close.
